REVOLUTION DISPLAY

The latest addition to the Philips Dynalite portfolio, the Revolution Display, delivers a cutting-edge user experience wrapped in a beautifully refined design. At just 10mm thick and sized at 88x88mm, this high-definition touchscreen panel is tailored for contemporary commercial and high-end residential spaces. Whether it's a luxury hotel, a state-of-the-art meeting room, or an elegant living space, the Revolution Display offers seamless integration, ultimate control, and personalisation at your fingertips.

PHILIPS DYNALITE

The Revolution Display is the result of continued innovation by Philips Dynalite, expanding the Revolution family of modular user interfaces. Designed with aesthetics and user experience in mind, it complements existing button modules and introduces new levels of functionality, powered by the Array design language.

PRODUCT OVERVIEW

- **Revolution Display** – 10mm slimline touchscreen panel (88x88mm)
- **Array Software Platform** – supports up to 16 fully customisable pages of controls
- **New Rim Finishes** – including gold, aluminium, white, and black
- **Environmental Sensor Suite** – temperature and humidity detection for HVAC integration

SYSTEM FEATURES

- **User Proximity Detection**: An advanced time-of-flight sensor allows the display to detect presence and "wake up" for interaction, returning to sleep when the user walks away - reducing energy usage and light pollution.
- **Audible Feedback**: Optional audio cues confirm selections for a more intuitive interaction experience.
- **Customisable Interface**: With up to 16 pages of control and over 60 pre-designed widgets, users can tailor the UI to suit lighting, HVAC, blinds, fans, macros and more. The new Array aesthetic supports millions of colour options and widget styles.
- **Macros & Scene Control**: One-touch activation of complex scenarios, like lighting, curtains, and climate presets, allows the user to set the perfect mood for any activity.
- **HVAC Integration**: Built-in temperature and humidity sensors allow smart control over fan speed, set points, and environmental monitoring - ideal for intelligent climate management.
- **Multilingual & Icon Labelling Support**: Revolution Display is ready for a global audience, with interface languages including English, Chinese, and Arabic, and a full icon set for universal navigation.

The Revolution Display is more than just a pretty interface, it's a versatile, powerful, and intuitive control hub designed for the modern world.

As part of Dynalite's ever-evolving ecosystem, it exemplifies the best in user-friendly innovation and refined architectural integration.
